

Course Name: Block System Troubleshooting

Hours to complete: 1.00

CEUs: 0.10

Description:

In this course learners will receive a basic understanding of how block systems work, and the tools and methods available to aid in troubleshooting. They will discover common block system troubleshooting techniques and will receive some examples and tips on how to resolve sensor problems.

Audience:

This program is designed for ride owners/operators, maintenance, inspectors and other amusement personnel who require continuing education and training for maintaining their certification to work in their respective positions per AHJ regulations and/ or company policies. This program is also ideal for individuals wishing to remain current on latest industry trends, standards and best practices applicable to their day to day job duties as it relates to their role.

Specific target audience includes:

Ride device inspectors, maintenance personnel, owner/ operators and management.

Prerequisites:

Participants enrolling in this course:

- Must have access to a mobile device or computer with connectivity to the internet for viewing the content within the learning management system.
- Must log in with their unique email and password credentials to access their course materials.
- Must have access to a stable, high speed Internet connection for optimal viewing of the content to minimize potential for buffering of multimedia in learning programs.

Evaluation:

Successful course completion includes:

- Review of the module content in its entirety
- Successful completion of the module quiz
- Completion of the module course evaluation survey.

Upon successful completion of all modules, participants must complete the course survey and then will have access to download their credentials and any associated CEUs.

Outcomes:

Participants in this course will:

1. Explain how a block system works in order to facilitate troubleshooting.
2. Discover common block system troubleshooting techniques.

3. Receive some examples and tips on how to resolve sensor problems.

Expectations:

Students will watch a learning module of content from the AIMS 2020 Safety Seminar video series and complete the assessment quiz at the end of the module.
