

Course Name: Common Ride Inspection Points

Hours to complete: 1.00

CEUs: 0.10

Description:

In this AIMS 2020 Safety Seminar series video course learners identify similarities between rides that will require inspection as they listen to a lecture on methods of how to inspect them. Discover the acceptance criteria that should be followed when in the inspection process and what resources are available when completing the inspection. Recognize the role of manufacturer and the requirements that should be inspected for rides as outlined by them. Discuss tolerance levels for different ride parts you may come across during the inspection process and how to recognize their tolerance levels using your resources. See examples of different tolerance levels for ride parts and listen to examples where the instructor reviews using their experience in the past on how to determine making the call to keep a part in a preventative maintenance schedule or removing all together from service as he shares his stories from inspecting.

Audience:

This program is designed for ride owners/operators, maintenance, inspectors and other amusement personnel who require continuing education and training for maintaining their certification to work in their respective positions per AHJ regulations and/ or company policies. This program is also ideal for individuals wishing to remain current on latest industry trends, standards and best practices applicable to their day to day job duties as it relates to their role.

Specific target audience includes:

Ride device, water slide, water attractions, trampoline and adventure course inspectors, maintenance personnel, owner/ operators, management and manufacturers.

Prerequisites:

Participants enrolling in this course:

- Must have access to a mobile device or computer with connectivity to the internet for viewing the content within the learning management system.
- Must log in with their unique email and password credentials to access their course materials.
- Must have access to a stable, high speed Internet connection for optimal viewing of the content to minimize potential for buffering of multimedia in learning programs.

Evaluation:

Successful course completion includes:

- Review of the module content in its entirety
- Successful completion of the module quiz
- Completion of the module course evaluation survey.

Upon successful completion of all modules, participants must complete the course survey and then will have access to download their credentials and any associated CEUs.

Outcomes:

Participants in this course will

Identify the commonalities of various amusement ride devices.

Discuss methods of inspecting.

Discover acceptance criteria of an inspection process.

Recognize the inspection requirements of the manufacturer

Discuss tolerance levels for ride parts.

Review a series of trainer examples of ride parts where the inspector had to determine whether or not a part on a preventative maintenance schedule or remove the part from service.

Expectations:

Students will watch a learning module of content from the AIMS 2020 Safety Seminar video series and complete the assessment quiz at the end of the module.
