

Course Name: Shop and Tool Safety & Lock Out Tag Out

Hours to complete: 1.00

CEUs: 0.10

Description:

This course will define and discuss the types of tools found in the workplace and will address the basic principles of handling, storing and inspecting common tools used in a typical amusement park property or shop. Learners will discover the best methods for inspecting and using tools in the workplace. Additionally, learners will gain an understanding of how to use Lockout/Tagout practices and procedures to safeguard themselves from the unexpected energization or startup of machinery and equipment, or the release of hazardous energy during service or maintenance activities. This course will review when and how equipment should be locked/tagged out.

Audience:

This program is designed for ride owners/operators, maintenance, inspectors and other amusement personnel who require continuing education and training for maintaining their certification to work in their respective positions per AHJ regulations and/ or company policies. This program is also ideal for individuals wishing to remain current on latest industry trends, standards and best practices applicable to their day to day job duties as it relates to their role.

Specific target audience includes:

Ride device, water slide, water attractions, trampoline and adventure course inspectors, maintenance personnel, course owner/operators, management.

Amusement manufacturers for ride devices, water slides, water attractions, trampoline and adventure courses

Prerequisites:

Participants enrolling in this course:

- Must have access to a mobile device or computer with connectivity to the internet for viewing the content within the learning management system.
- Must log in with their unique email and password credentials to access their course materials.
- Must have access to a stable, high speed Internet connection for optimal viewing of the content to minimize potential for buffering of multimedia in learning programs.

Evaluation:

Successful course completion includes:

- Review of the module content in its entirety
- Successful completion of the module quiz
- Completion of the module course evaluation survey.

Upon successful completion of all modules, participants must complete the course survey and then will have access to download their credentials and any associated CEUs.

Outcomes:

Participants in this course will:

1. Define and discuss the types of tools commonly found in the workplace.
2. Identify the hazards associated with the use of tools and hazardous energy in the workplace.
3. Discuss how to safely handle and carry tools at work.
4. Discover the best methods for inspecting and using tools in the workplace.
5. Become aware of how to protect yourself from hazards related to tools and hazardous energy.

Expectations:

Students will watch a learning module of content from the AIMS 2020 Safety Seminar video series and complete the assessment quiz at the end of the module.
