

**Course Name: Developing a Maintenance Training Program**

**Hours to complete:** 1.00

**CEUs:** 0.10

**Description:**

In this 2020 AIMS Safety Seminar series video course, learn how to build an internal maintenance training program. Participants taking this program review the ASTM standard and how it is important for creating consistency in maintenance training. Participants will also outline what should be required in a maintenance training program and review real examples of a basic and expanded "Safety Critical Maintenance Manual". And lastly, learners will recognize what a maintenance training process is and identify what documentation is required for a training process.

**Audience:**

This program is designed for ride owners/operators, maintenance, inspectors and other amusement personnel who require continuing education and training for maintaining their certification to work in their respective positions per AHJ regulations and/ or company policies. This program is also ideal for individuals wishing to remain current on latest industry trends, standards and best practices applicable to their day to day job duties as it relates to their role.

**Specific target audience includes:**

Ride device, water slide, water attraction, trampoline and adventure course maintenance personnel, owner/operators and management.

**Prerequisites:**

Participants enrolling in this course:

- Must have access to a mobile device or computer with connectivity to the internet for viewing the content within the learning management system.
- Must log in with their unique email and password credentials to access their course materials.
- Must have access to a stable, high speed Internet connection for optimal viewing of the content to minimize potential for buffering of multimedia in learning programs.

**Evaluation:**

Successful course completion includes:

- Review of the module content in its entirety
- Successful completion of the module quiz
- Completion of the module course evaluation survey.

Upon successful completion of all modules, participants must complete the course survey and then will have access to download their credentials and any associated CEUs.

**Outcomes:**

Outcomes

In this session, participants will:

1. Define ASTM and its importance
2. Identify to the required elements of a maintenance training program.
3. Review examples of a basic and expanded “Safety Critical Maintenance Manual”.
4. Recognize the training process and the required documentation used in the process.

**Expectations:**

Students will watch a learning module of content from the AIMS 2020 Safety Seminar video series and complete the assessment quiz at the end of the module.
