

Course Name: Hazard Communication Basics

Hours to complete: 0.75

CEUs: 0.10

Description:

Chemicals have become an important element of almost every aspect of modern life. All of these chemicals—from cleaning fluids to pharmaceuticals, pesticides, and paints— may be used in workplaces, such as in the amusement industry. While these chemicals have utility and benefits in their applications, they also have the potential to cause adverse effects. OSHA’s HCS, 29 CFR 1910.1200, addresses the informational needs of employers and workers with regard to chemicals. This course will review OSHA’s standard for Hazard Communication and discuss the safe use, labeling and training in the workplace. The course will also discuss planning for the use of safer chemicals in the workplace.

Audience:

This program is designed for ride owners/operators, maintenance, inspectors and other amusement personnel who require continuing education and training for maintaining their certification to work in their respective positions per AHJ regulations and/ or company policies. This program is also ideal for individuals wishing to remain current on latest industry trends, standards and best practices applicable to their day-to-day job duties as it relates to their role.

Specific target audience includes:

Ride device, water slide, water attraction, trampoline and adventure course maintenance personnel, owner/ operators, management and manufacturers looking to improve efficiencies in their performance.

Prerequisites:

Participants enrolling in this course:

- Must have access to a mobile device or computer with connectivity to the internet for viewing the content within the learning management system.
- Must log in with their unique email and password credentials to access their course materials.
- Must have access to a stable high speed internet connection for optimal viewing of the content to minimize potential for buffering of multimedia in learning programs.

Evaluation:

Successful course completion includes:

- Review of the module content in its entirety
- Successful completion of the module quiz
- Completion of the module course evaluation survey.
-
- Upon successful completion of all modules, participants must complete the course survey and then will have access to download their credentials and any associated CEUs.

Outcomes:

Participants in this course will

1. Explain what hazard communication information is required to be provided to employees.
2. Define the requirements of labeling chemicals in the workplace.

3. Demonstrate how to read Safety Data Sheets for chemicals.
4. Identify the approved pictograms that can be used on chemical labels.
5. Recall how to select safer chemical products in the workplace.

Expectations:

Students will watch a learning module of content from the AIMS 2020 Safety Seminar video series and complete the assessment quiz at the end of the module.
