AIMS connectED — Lesson Plan

Course Name: **Travel Show Security**

Hours to complete: 0.75
CEUs: 0.10
Description:
This course defines traveling shows or events and how to provide the best security for all aspects of the event. Topics of discussion include security of transportation equipment, pre-staged equipment including rides and booths, security of staff camping/living quarters, security of move-in/set-up and tear down/move out processes, as well as health and welfare concerns.

Needs analysis:
With the growth in amusements globally and accidents on the rise, there is an international demand for amusement safety training in many nations. AIMS online courses through *AIMSconnectED,* an LMS will fill the need of brining education worldwide with the goal improving amusement safety globally.

Ride owners/operators, maintenance, inspectors and other amusement personnel require continuing education and training for maintaining their certification to work in their respective positions per AHJ regulations and/ or company policies. Also, there are individuals working in the amusement industry that desire professional development to remain current on latest industry trends, standards and best practices applicable to their day-to-day job duties as it relates to their role.

AIMS requires certificate holders to obtain 40 hours continuing education hours to renew their training every two years. Certificate holders can attend the AIMS Safety Seminar to renew or participate in online learning modules to obtain continuing education units to remain current.

Other certificate programs in the amusement industry require contact hours to renew their certification programs. AIMS programs are acceptable professional development, contact hours that can satisfy this requirement.

Legislation and regulations require professional development, education and training for inspectors in the amusement industry. There are limited options that provide this specified education apart from on-the-job training and manufacturer training when a ride is initially commissioned. Currently contact hours and continuing education is only available in face to face (live) instruction seminars and courses.

Evaluation:
Successful course completion includes:

- Review of the module content in its entirety
- Successful completion of the module quiz
- Completion of the module course evaluation survey.

Upon successful completion of all modules, participants must complete the course survey and then will have access to download their credentials and any associated CEUs.

Outcomes:
Participants in this course will

1. Define traveling show or event.

2. Discuss types of security necessary for equipment and assets

3. Review security particular to staff camping and living quarters.

4. Recognize that health and welfare concerns are security issues

Facility / equipment requirements:
Trainer/ presenter:

Classroom, lapel mic, easel pad, marker, AIMS visual aid template for presentation, LCD projector, - camera crew for recording, handheld mics as backup, data storage drives.

Designer:

For developing the course: AIMS templates for presentations, videographers, easel pads, markers, materials (bookends deck in materials for presentation). An LMS platform.

Student materials:

Access to a computer or mobile device. Stable high speed Internet connection.

Instructional methods:
Lecture, presentation and demonstration by real examples using images and/or videos

Assessment methods:
True and false quizzes, multiple choice questions and answers in content exercises.

Learning styles:
Auditory, visual presentations, and reading/writing

Program design lesson planning:

- Information described below in the lesson design references the content on page one of the **lesson plan document** and

- Information described below in the lesson design references the content on page one of the **lesson plan document** and how it is outlined to be instructed for the program.
- The *outcomes* numbered below by lesson are the outcomes planned for each lesson in this program.
- Instruction *Methods* and *Assessments* to achieve program outcomes in each lesson are described below for this program.

Lesson Plan

- *Learning styles* used during instruction for each lesson are listed below for this program.

Lesson	Outcomes	Instructional Methods	Assessment Methods	Learning Styles	
Module 1	1, 2, 3, 4	Presentation, lecture, discussion Q&A, scenarios, with examples	True/False and Multiple Choice Quiz
