

Course Name: Field Inspections 101

Hours to complete: 0.75

CEUs: 0.10

Description:

This session is focusing on the field of amusement ride and device inspection regarding mobile devices. The discussion will focus on identifying key components, using the manuals and why the task is the most important part of any job we do.

Audience:

This program is designed for ride owners/operators, maintenance, inspectors and other amusement personnel who require continuing education and training for maintaining their certification to work in their respective positions per AHJ regulations and/ or company policies. This program is also ideal for individuals wishing to remain current on latest industry trends, standards and best practices applicable to their day-to-day job duties as it relates to their role.

Specific target audience includes:

Ride device, water slide, water attraction, trampoline and adventure course maintenance personnel, owner/ operators, management and manufacturers looking to improve efficiencies in their performance.

Prerequisites:

Participants enrolling in this course:

- Must have access to a mobile device or computer with connectivity to the internet for viewing the content within the learning management system.
- Must log in with their unique email and password credentials to access their course materials.
- Must have access to a stable high speed internet connection for optimal viewing of the content to minimize potential for buffering of multimedia in learning programs.

Evaluation:

Successful course completion includes:

- Review of the module content in its entirety
- Successful completion of the module quiz
- Completion of the module course evaluation survey.

Upon successful completion of all modules, participants must complete the course survey and then will have access to download their credentials and any associated CEUs.

Outcomes:

Participants in this course will

1. Identify the differences and similarities between a park and mobile setting and how it relates to amusement rides and devices.
2. Describe the basics of inspection; see, verify, document.
3. Apply the use of bulletins and prints to inspect the ride completely.
4. Describe how the manufacturer's suggested daily inspection is only the starting point and will be introduced to preventative

replacement and maintenance.

Expectations:

Students will watch a learning module of content from the AIMS 2020 Safety Seminar video series and complete the assessment quiz at the end of the module.
